

ATOMIC ENERGY COUNCIL

PUBLIC NOTICE

1.0 INTRODUCTION

The Atomic Energy Council (AEC) is a government body established by the Atomic Energy Act Cap. 154 with a mandate to regulate the peaceful applications and management of ionizing radiation for the protection and safety of society and the environment from the dangers resulting from ionizing radiation. The use of atomic energy in Uganda is in medical, industrial, security, agriculture, research among other fields. Section 31 of the Act prohibits any person to acquire, own, possess, operate, import, export, hire, loan, receive, use, install, commission, decommission, transport, store, sell, distribute, dispose of, transfer, modify, upgrade, process, manufacture or undertake any practice related to the application of atomic energy unless permitted by an authorisation issued under the Act. In this regard, AEC wishes to inform the public on the compliance or non-compliance with Section 31 of the Act by facilities in possession of radiation sources as follows.

As of July 28, 2025, three hundred and sixty-nine (369) facilities had valid licenses to possess and use radiation sources of which four hundred forty-two (442) licenses to possess and use radiation sources had been issued. Of those licenses issued, 360 (81.5%) are for medical, 46 (10.4%) for industrial and 36 (8.1%) are for security sources.

Out of the six hundred and ninety-four (694) active facilities, one hundred and eight (108) (15.5%) facilities have expired licenses, and these are required to renew their licenses immediately or cease operations. In addition, fifty-nine (59) facilities (8.5%) have never been licensed. Of the never licensed facilities, authorisation process was halted for some facilities due to safety related gaps identified in their practices and are not allowed to operate without licenses, whereas others have not applied.
